

Delivering superior patient care begins with improving assessments.

“ Consider NIR light technology to identify peripheral venous sites and facilitate more informed decisions about vein selection. ”

Infusion Therapy Standards of Practice – Infusion Nurses Society

VeinViewer® is supported by more clinical evidence than any other vein visualization device. INS specifically recognizes near-infrared visualization as the ideal technology for the placement of short peripheral catheters.

When implementing vein visualization technology trust the evidence, trust VeinViewer.

**A value added program that delivers training and confidence.**

At Christie, we understand that maintaining a high level of clinical excellence and utilization are necessary to receive the maximum return on investment in new technologies. Our Christie Assure Program™ includes five years of extensive product utilization training, continuing education opportunities and a comprehensive product warranty.

**Imaging is in our corporate DNA.**

Our parent company, **Christie® Digital Systems**, is recognized as one of the most innovative visual technology companies in the world. They hold over 100 patents and have been awarded countless industry honors (even two Academy Awards). **Christie Medical Holdings** is committed to improving the patient experience while lowering risks and costs of care. Our VeinViewer® products pioneered the category and are clinically proven to achieve first stick success, reduce PICC lines and increase patient satisfaction.

**Illuminating revolutionary patient care.™**

# VeinViewer® Vision2 is designed for first stick success in less time.

With VeinViewer®, clinicians can quickly and confidently detect veins that are difficult to find through sight and palpation, significantly reducing assessment time and stick attempts. VeinViewer by Christie uses harmless near-infrared (NIR) light to project a high definition, real-time image of patient veins directly onto their skin. With a built-in suite of imaging modes, there's an ideal setting for every patient type.

## We're proud to be preferred by America's top hospitals.

Many of the most recognized and highly regarded hospitals in the nation trust VeinViewer® technology. We've earned their trust by delivering on our promise to provide an easy-to-use system that profoundly and measurably impacts their ability to provide superior vascular access.

We recognize your goals for efficient, consistent, safe delivery of infusion therapies. VeinViewer by Christie helps you meet these goals through lower costs, reduced time and an improved patient experience.

## Engineered to meet the demands of today's clinical reality.

VeinViewer Vision2 – our latest technology – was born from countless hours of conversations with clinicians. We listened carefully, and we're confident that we've designed a solution that truly makes a difference every single day.

That's why VeinViewer is precisely the right technology at exactly the right time.

## An improved patient experience that makes everyone feel better.

Starting with improved first stick success, VeinViewer Vision2 is clinically proven to positively impact people throughout the hospital. Clinicians, patients, risk management and hospital leadership will experience the benefits of VeinViewer technology.

**100%**  
**Clinicians**  
Increase first stick success by up to **100%**

**30%**  
**Risk Management**  
Decrease PICC lines placed due to difficult venous access by more than **30%**

**100%**  
**Patient Experience**  
First stick success increases (overall) patient satisfaction by **100%**

**\$28,000**  
**Hospital**  
Reduction in PICC lines placed at a **60** bed unit equates to an annual savings of more than **\$28,000**
